

DO YOU HAVE FIBER CONNECTIVITY THAT WORKS 95% OF THE TIME?

Introducing VSAT Backup on Demand Reliable Global Satellite Connectivity, Always at Your Fingertips!

Oasis VSAT Backup on Demand (BoD) uses our cutting-edge VSAT technology to step in when fiber connectivity steps out to give 100 per cent connectivity, 100 per cent of the time wherever and whenever it's needed.

Reliability is no longer a concern. When fiber connectivity falters, our system seamlessly takes over, ensuring uninterrupted connectivity at a flawless 100%. Perfect for safeguarding your mission-critical operations.

Importantly the platform works globally without any geographical limitations using a fleet of 100 plus SES satellites.

Connectivity: Mission critical applications

Fiber connectivity, although very effective in terms of both price and service, fails to provide 100% connectivity thus bringing mission critical applications such as life-saving healthcare and education to a halt. Lost connectivity can mean the difference between life and death.

Traditional VSAT backup services provide an excellent alternative but they are expensive as they are online continuously, even when they are not required. Oasis VSAT BoD can be switched on and off to give fiber backup at the touch of a button, whenever and wherever it is needed.

Flexibility: Seamlessly switch connectivity on and off

A unique feature of Oasis VSAT BoD is our unified price list with a day-to-day billing cycle. Essentially you buy a bank of VSAT days of either 15, 20 or 25 days to use whenever and wherever you need. Simply request the backup service to be switched on and off. Need more days? Never worry about losing connectivity, just add another bank of VSAT days anytime during the year.

Features and Benefits

- **Rapid response**
- **Global coverage**
- **Clear and concise pricing**
- **Installation teams on the ground**

Oasis VSAT BoD – choosing your bank of VSAT days is as simple as 1-2-3:

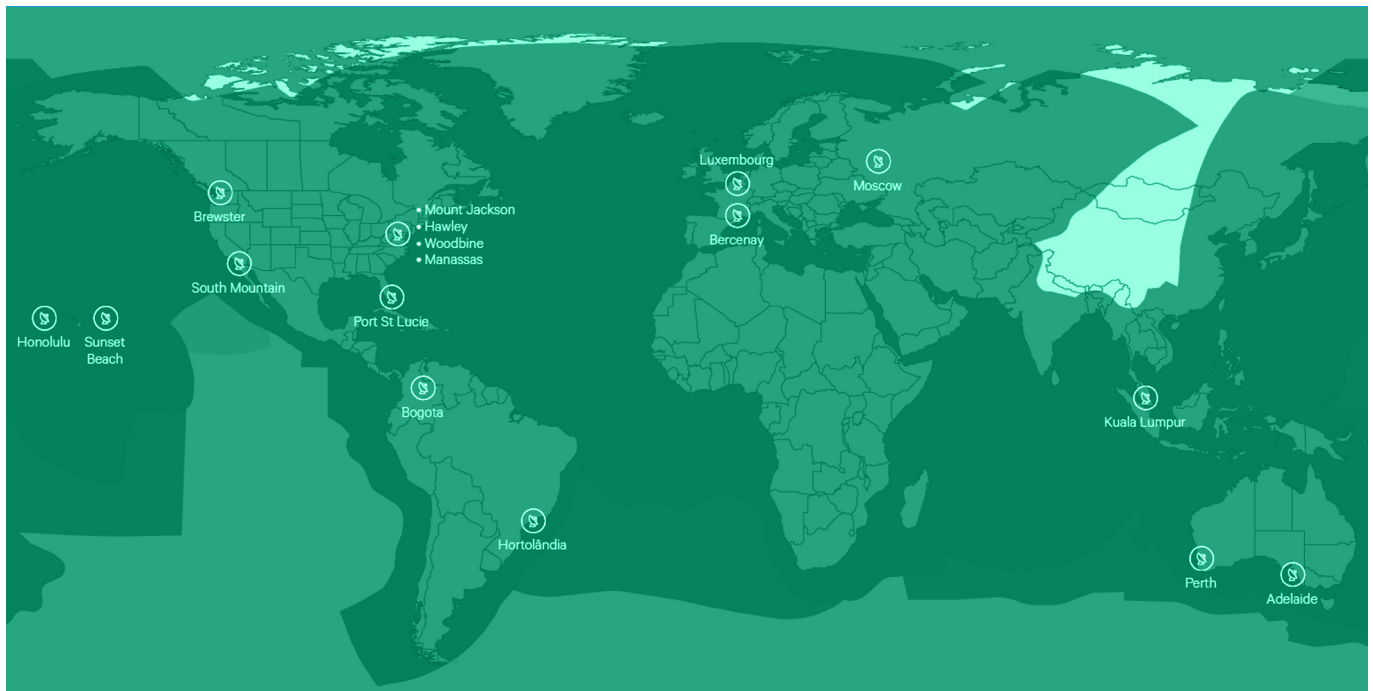

- 1.** Select your preferred bandwidth package.
- 2.** Determine the number of days needed annually.
- 3.** Specify your GPS location.

Then get ready for your installation. Our team on the ground will install, check, and test, and within three days you are ready to increase your broadband connectivity to 100 per cent whenever you need it at the touch of a button.

Simplicity: Choose the package that suits you**

PRICES: USD	SMALL (2mb/0.5mb)	MEDIUM (5mb/1.25mb)	LARGE (8mb/2mb)
One-time annual price			
15 Days	\$552	\$765	\$1,092
20 Days	\$816	\$1,060	\$1,416
25 Days	\$1,080	\$1,355	\$1,620
